

Technology

M-20QB

This design features a black silicone skirt and strap.

PLATINA

[PAT.P.] **M-20** N/A in Australia

- High-tech design for the ultimate comfort
- Direct sashing 2-window design for super-thin form
- The narrow center joints eliminate the vision field split

Features

- **High-tech design for the ultimate comfort**
The design of M-20 minimizes frame volume to achieve a bold slim design and lighter weight.
- **Direct sashing 2-window**
TUSA has devoted years of research to improving the diving mask's field of vision. The result is the Direct Sashing System (D.S.S.).
- **The narrow center joints eliminate the vision field split**
It eliminates the inner frame that blocks the field of vision and attaches the lens directly to the frame to realize a startlingly new super-slim design. The result is a major increase in the upper/lower-left/right visibility range.

MC-20 L/R

- **Corrective Lenses [L or R]**
Available in diopters from -1.5 through -8.0 in 0.5 increments.

Technology

Splendive II

[PAT.P.] **M-40** N/A in Australia

- Low volume design for snug fit and easy clearing
- Bi-symmetrical lenses for easy installation of corrective lenses
- Advanced and compact 4-window design with wide field of vision and light weight for comfort

Features

- **Low volume design**
Thanks to its low air volume the M-40 is less buoyant than most other designs, reducing unwanted lift. It also incorporates a lightweight but sturdy tempered glass lens which further adds to this mask's unique compact design.
- **Bi-symmetrical lenses**
Corrective lenses are also available for easy installation making this mask suitable for any diver.
- **4-window design**
The M-40 features a four-piece panoramic view made of a split front lens and two side view lenses for unsurpassed peripheral vision.

MC-7500 L/R

- **Corrective Lenses [L or R]**
Available in diopters from -1.5 through -8.0 in 0.5 increments.
