

R295 OCTOPUS

OVERVIEW

PARAMETERS

This octopus is derived from the legendary R190 and starts the 2006 season in a new fresh look and with improved air flow properties.

DESIGN & PERFORMANCE

- Classic downstream valve. Esteemed for many years for its reliable performance due to the robust design and low maintenance.

ENVIRONMENT & ADJUSTMENTS

- The ideal octopus. Features a 1-meter hose for convenient alternate air source function and a signaling yellow cover and hose protector for easy identification.
- Reversible attachment of low pressure hose. For right or left hand use and a comfortable positioning as an alternate air source.
- Specially designed for rental and training facilities and recreational divers.
- Fixed VIVA flow vane. Fixed in the pre-tuned ideal position for safe and uncomplicated use.

COMFORT

- Extremely lightweight and compact. Also suits young divers comfortably when equipped with our Junior Mouthpiece.
- Redesigned Classic purge. A traditional feature in a new modern look.
- Essential and robust.

The R295 Octopus matches **all SCUBAPRO** first stages.
